

The Bin That Communicates!

RECYCLING

PROMOTIONAL

This ErgoCan collection and recycling system will enhance your collection program with eye catching graphic display panels. Enjoy the many benefits of this stylish system including:

- ✓ 30 Gallon - 11"W x 19"L x 30"H (279 x 482 x 762mm). The showroom quality graphic display panels will clearly communicate your message from any angle in cafeterias, arenas & stadiums, outdoor grounds, special events, convention centers ... any space
- ✓ Compact Design - fits in the tightest locations. Snug to the wall, under a counter, in a corner, connect them together to make a Recycle Station
- ✓ Inter-Liner - Ergonomically friendly vacuum break features
- ✓ Unique Lid-Lock feature - conceals bag and eliminates bag "falling-in" problem for a consistently neat and clean appearance
- ✓ Perfect-Fit bags - Utilize 98% of the bag. Helps to reduce consumption thus saving costs
- ✓ ErgoCan bins are made with recycled plastic content
- ✓ Connector System - connects several bins together to create a uniform appearance. See ECCONNECTOR on the next page for more details
- ✓ Messaging Panels (your design here) – Effective & Visible Communication. Design your own messaging graphic display panels with our easy-to-use design templates. Or use our many stock designs. If you choose to use our designs, you may want to personalize it with your logo. That's right, we can add your logo to it! Go to our library of stock designs @ www.ergocan.com/stockdesigns or scan this QR code

EC1119

ECSIGNBOARD

- ✓ 8.5"x14" (legal size)
- ✓ Option to choose between Portrait or Landscape
- ✓ Perfect for adding additional signage to your ergocan

Scan this QR code or go to www.ergocan.com/signboard for more information!

Communicate Your Message in Bold Highly Visible Graphics Seen From All Directions

Ergonomics

4 vacuum breaks built into the Inter-Liner of the bin allows air to flow around bag. This removes the vacuum effect of the bag sticking to the bin, so the bag can be more easily removed. Thus, minimal vertical lifting is required. May reduce the risk of MSD (Musculoskeletal Disorder); injuries to the neck, shoulder, and lower back due to heavy lifting vertically

ECCONNECTOR

Connect together EC1119 bins with our Connector System. Connect together as many as you like, creating a Recycling Station. They will be spaced evenly apart making for a uniform appearance

EC1119LID Lid Options

Each lid has a textured grain finish. There are Lid Label locations on each one (except Funnel lid)
